With this updated edition, authors Randy Schueller and Perry Romanowski re-emphasize the importance of providing introductory technical information to those who would like to improve their understanding of cosmetic science. The authors were frustrated with the lack of technical resources available for beginners in this industry. They believe that this lack of introductory material has a negative impact on the industry's ability to recruit and retain talented chemists. Since the 1999 publication of the original Beginning Cosmetic Chemistry, thousands of new chemical raw materials and new formulations have been developed, countless new marketing concepts have been tested and hundreds (if not thousands) of new cosmetic regulations have been enacted. The four major sections of this book include: -Orientation, Tools and Terms -Cosmetic Ingredients and Vehicles -Product Development -Product Testing This

newly updated edition will be a valuable resource for years to come!

Part of the practical and dynamic Procedures in Cosmetic Dermatology Series, Chemical Peels, 3rd Edition, brings you up to speed with today's best uses of traditional and new acids for skin rejuvenation. This well-organized, superbly illustrated text covers every aspect of this must-know field, including patient evaluation, skin preparation, procedural technique from light peels to advanced deep peels, and managing complications. Dr. Suzan Obagi leads a team of global experts to offer evidence-based, procedural how-to's and step-by-step advice on proper techniques, pitfalls, and tricks of the trade, so you can successfully incorporate the latest procedures into your practice. Features many new chapters dedicated to specific peels or skin conditions: trichloroacetic acid (TCA) peels of the chest, neck, and upper extremities; peels as an adjuvant treatment of acne; chemical peels in male patients; several chapters on unique approaches to acne scars; a chapter on combining peels with surgical procedures; and several chapters on safely performing deeper, modified phenol peels. Covers new acid formulas, new peel types, and need-to-know procedures such as the combined Jessner-TCA-retinoid peel and how to vary technique for darker skin types. Features a well-organized format with key points lists, pearls, and case studies as they appear in practice. Includes many new images and procedural videos that depict exactly how to perform the techniques, allowing you to easily incorporate chemical peels into your practice and take your knowledge of chemical peels to the next level.

Welcome to this 'novice's guide'. At last a book that explains the real science behind the cosmetics we use. Taking a gentle approach and a guided journey through the different product types, we discover that they are not as superficial as often thought and learn that there is some amazing science behind them. We shall uncover some of the truths behind the myths and point out some interesting facts on our way. Did you know? Vitamin E is the world's most used cosmetic active ingredient. At just 1mm thick, your amazing skin keeps out just about everything it's exposed to – including your products! A 'chemical soup' of amino acids, urea, mineral salts and organic acids act as 'water magnets' in the skin keeping it naturally moisturised. Discovered centuries ago, iron oxides (yes, the same chemicals as rust) are still commonly used inorganic pigments in foundations. A lipstick is a fine balance of waxes, oils and colourants to keep the stick stable and leave an even gloss on your lips.

This text defines what constitutes cosmeceuticals and discusses various classes of products, from anti-ageing skin care and repair, anti-acne, and hair-growth compounds to agents for treating skin infections, rashes and irritations.
