The magazine covers General Knowledge, Science and Technology news, Interviews of toppers of examinations, study material of Physics, Chemistry, Zoology and Botany with model papers, reasoning test questions, facts, quiz contest, general awareness and mental ability test in every monthly issue.

Competition Science Vision (monthly magazine) is published by Pratiyogita Darpan Group in India and is one of the best Science monthly magazines available for medical entrance examination students in India. Well-qualified professionals of Physics, Chemistry, Zoology and Botany make contributions to this magazine and craft it with focus on providing complete and to-the-point study material for aspiring candidates. The magazine covers General Knowledge, Science and Technology news, Interviews of toppers of examinations, study material of Physics, Chemistry, Zoology and Botany with model papers, reasoning test questions, facts, quiz contest, general awareness and mental ability test in every monthly issue.

The contributions to this volume explore several focal issues related to the global spread of English and their implications for English language teaching, providing both theoretical and empirical perspectives on recent research and implications in educational terms. The volume is divided into three thematic sections, namely "Developments in ELF research and pedagogic implications", "Raising teachers' awareness of ELF", and "ELF and ELT practices". The book provides up-to-date perspectives on the issues, implications and repercussions that findings in ELF research can have for ELT practices. The contributors are all scholars and researchers who have long been engaged in ELF-related research, and who have undertaken operational and practical work in the field, and, as such, offer novel perspectives on the effects of EFL research on the teaching and learning of English. The volume also presents the findings of innovative projects in teacher education, involving pre- and in-service teachers, providing exemplificative good practices of possible new routes into pluralistic, ELF-aware and ELF-oriented didactic perspectives.

The Oxford Handbook of Chinese psychology is the first book of its kind - a comprehensive and commanding review of Chinese psychology, covering areas of human functioning with unparalleled sophistication and complexity. In 42 chapters, leading authorities cite and integrate both English and Chinese-language research in topic areas ranging from the socialization of children, mathematics achievement, emotion, bilingualism and Chinese styles of thinking to Chinese identity, personal relationships, leadership processes and psychopathology. With all chapters accessibly written by the leading researchers in their respective fields, the reader of this volume will learn how and why China has developed in the way it has, and how it is likely to develop. In addition, the book shows how a better understanding of a culture so different to our own can tell us so much about our own culture and sense of identity.

This volume is a compilation of 21 distinguished chapters, an Introduction, and an Afterword with a thematic focus on the functional variations of English in non-native contexts. Highly acclaimed scholars in the field of (applied) linguistics, bringing their expertise from the core areas of general linguistics, sociolinguistics, psycholinguistics, cognitive linguistics, educational linguistics, and stylistics, address the ways in which English

language varies in different contexts. The contributions carefully examine the variations, the complexities and the concerns arising thereof, and explore the resultant pedagogical implications. The volume, in this respect, contributes to an informed process for policy decisions, curriculum design, material development, and most importantly classroom practices based on the ability, feasibility and desirability of English for the users, as a step towards nurturing globally-minded, globally-competent, and globally-functioning individuals. Taking the deliberations through and beyond Kachru's world Englishes model of three circles, this book is an attempt to: See what the users of English 'do' or 'do not do' with the language, rather than 'where' they come from Create a flexible mindset to enable acceptance and respect for linguistic variations in English usage Promote practical abilities for language and 'communication management' Facilitate informed pedagogical practices based on global realities

Intercultural communication is a necessary skill for those who work in the public and nonprofit sectors, and yet there is a dearth of literature available to help public and nonprofit professionals develop an ability to effectively communicate, interact, and lead in a multicultural society. Drawing on research in intercultural communication, psychology, and public and nonprofit administration, Culturally Mindful Communication provides useful strategies for students and practitioners of public service to improve their intercultural communication skills. Topics include: expectations for public and nonprofit professionals in today's multicultural society frameworks for assessing cultural differences and similarities verbal and nonverbal communication in the intercultural context stereotyping, prejudice, ethnocentrism, microaggression, and social privilege as barriers for effective intercultural communication key considerations for effective multicultural teams approaches for effective multicultural community engagement, and leading with cultural mindfulness. To facilitate student learning, several useful pedagogical features are employed throughout the book. The reader follows the stories of two fictional characters - Lavita, a cultural coordinator in city government, and Leo, a program manager at a nonprofit - in their intercultural communication challenges in public and nonprofit sectors. Mini-case stories called 'cultural moments' are incorporated to illustrate real-world intercultural communication examples and to invite application of the tools and concepts introduced in the text. Each chapter includes a set of discussion questions designed to build on the intercultural communication challenges of Lavita and Leo and the 'cultural moments' as well as activities that can be completed in class or as homework assignments. Designed to offer guidance to both current and would-be public servants, Culturally Mindful Communication will be required reading for Public Administration and Public Affairs courses that address diversity and cultural competence, as well as for practitioners looking to develop their intercultural leadership and communication skills.
