This book is printed on responsibly sourced, 100% recycled FSC paper and using soy inks. Do you want to make a difference and help change the world? If the answer's yes then this book is for you! Turn the pages and discover everything you need to know about deforestation and the ways we can tackle it. From scientists and conservationists helping to protect forest creatures, to tech inventions like robot tree-planters, this book helps children aged 8 and up to discover the incredible solutions to deforestation that are being worked on around the world right now. Readers can begin by exploring different forest types around the world, discovering what makes each of them precious and unique, before taking a look at the causes, effects and solutions to deforestation. The final section explores what readers can do to help. Filled with guides, tips and lessons in how to use your voice and change your habits, these pages help readers learn how they can make a difference. Engaging text by Dr Jess French, presenter of Minibeast Adventure with Jess on CBeebies, with stunning artwork by Alexander Mostov, illustrator of D-Day: Untold Stories of the Normandy Landings Inspired by 20 Real-Life People.

Michelle Ann Abate examines a variety of texts that offer information, ideology, and even instructions on how to raise kids right, not just figuratively, but politically. Highlighting the works of William Bennett, Lynne Cheney, Bill O'Reilly, and others, she brings together such diverse fields as cultural studies, literary criticism, political science, childhood studies, brand marketing, and the cult of celebrity. --from publisher description.

Join Ayden the Astronaut, his dog Zoom and his friends as they travel back to Earth to see how pollution and global warming has taken a terrible toll! Will they be able to help heal the earth? Find out in this amazing astronaut adventure—an adventure that takes you from the moon, to Earth, and back again! A beautiful story that reminds us of the need to protect our planet earth and its depleting resources. This rhyming story about love for our planet is suitable for 3-8 years old.

Ms. Frizzle introduces her students to scientific facts about global warming, sharing accessible information about climate change and ways that everyday kids can help to protect the environment.

Tropical forests are an undervalued asset in meeting the greatest global challenges of our time—averting climate change and promoting development. Despite their importance, tropical forests and their ecosystems are being destroyed at a high and even increasing rate in most forest-rich countries. The good news is that the science, economics, and politics are aligned to support a major international effort over the next five years to reverse tropical deforestation. *Why Forests? Why Now?* synthesizes the latest evidence on the importance of tropical forests in a way that is accessible to anyone interested in climate change and development and to readers already familiar with the problem of deforestation. It makes the case to decisionmakers in rich countries that rewarding developing countries for protecting their forests is urgent, affordable, and achievable.

The future looks bleak unless eighteen-year-old Lance and his New Camelot Earth Warriors can save the planet from catastrophic climate change. Spurred by twelve year-olds Billy, Enya, Itzamma, and his ten-year-old brother, Chris, Lance creates a branch of Earth Warriors, a youth-led movement designed to save the earth from its greatest enemy—greed. His involvement leads to Earth Warrior crews springing up all across America. Millions of kids leap into action, paralyzing the country and alarming the rich and powerful. Having adopted his father's philosophy of doing what's right, rather than what's easy, Lance makes serious enemies when he calls out New Camelot donors who represent fossil fuel or other polluting industries, and then barely escapes a series of "accidents" designed to kill him. When he challenges the United States Congress to step up and act immediately on the climate crisis, the attacks on him escalate. With the majority of America's kids on his side, Lance and his young Earth Warriors prepare for the United Nations Conference of the Parties in Paris, where they will call upon world leaders to stop talking about sustainability and start acting on it. But whoever wants him dead isn't giving up. Will Lance and his crew live long enough to even get to Paris? *Warrior Kids* is a standalone tale set within the *Children of the Knight* universe.

Our waste has an enormous impact on the underwater world, its ecosystems and inhabitants. Our health and survival are also affected. Can we change it? The Kids-for-the-Ocean education program has been developed for all children. As Generation Hope, they are the decision-makers of tomorrow and the bearers of hope to bring about change. The program is easy to use in class or during supervised free time. It is also designed for everyday family life. This book offers inspiration, solutions and is intended to encourage reasonable choices. Not only will Planet Ocean change - we, too, will change.

"Wonders of the Annamites" takes readers on a journey through one of the wildest and most biodiverse parts of the world; a range of rugged mountains bordering Laos and Vietnam known as the Annamites. Relatively unexplored until recent decades, the Annamites are now a hotspot for wildlife discoveries new to science. This is the first children's book to focus exclusively on the animal wonders of this little known region. The story follows a local father, daughter and son on a trek to visit their grandmother in this ancient, almost mystical, mountain landscape. Join them as they journey along rivers and through bamboo, up rocky cliffs and down into steamy tropical forests, and discover a wondrous world of wildlife along the way. Learn about the rare and recently discovered animal species restricted to the Annamites such as the Saola, White-Cheeked Gibbon, Crested Argus, Red-Shanked Douc and other incredible iconic species of Southeast Asia.

A modern fable with an urgent message for young environmentalists. Lynne Cherry journeyed deep into the rain forests of Brazil to write and illustrate this gorgeous picture book about a man who exhausts himself trying to chop down a giant kapok tree. While he sleeps, the forest's residents, including a child from the Yanomamo tribe, whisper in his ear about the importance of trees and how "all living things depend on one another" . . . and it works. Cherry's lovingly rendered colored pencil and watercolor drawings of all the "wondrous and rare animals" evoke the lush rain forests. Features stunning world maps bordered by detailed illustrations of fascinating rainforest creatures. An IRA Teacher's Choice (1991), ABA's Pick of the Lists, Reading Rainbow Review Book, NSTA-CBC Outstanding Trade Book for Children.
