~~The Curriculum Topic Study (CTS) process provides a professional development strategy that links mathematics standards and research to curriculum, instruction, and assessment.~~

~~Modeling Mathematical Ideas combining current research and practical strategies to build teachers and students strategic competence in problem solving.This must-have book supports teachers in understanding learning progressions that addresses conceptual guiding posts as well as students’ common misconceptions in investigating and discussing important mathematical ideas related to number sense, computational fluency, algebraic thinking and proportional reasoning. In each chapter, the authors opens with a rich real-world mathematical problem and presents classroom strategies (such as visible thinking strategies & technology integration) and other related problems to develop students’ strategic competence in modeling mathematical ideas.~~

~~How can colleges and schools support the inclusion of family, school and community engagement curricula in teacher and administrator preparation programs? The contributions in this book try to answer this question, with contributors describing their experiences, their programs, and their support for the goal of enhancing parental involvement and engagement in Schools and Colleges of Education. The authors and researchers, such as Joyce Epstein, who is the foremost researcher on the topic, have the knowledge and expertise in family, school, and community engagement and partnerships from both theory and best practice perspectives. The book is designed to be interactive, and readers are encouraged to engage themselves in the conversation. Readers are invited to e-mail any of the editors to discuss the questions posed. This book was originally published as a special issue of Teaching Education.~~

~~Though decades ago school shootings were rare events, today they are becoming normalized. Active shooter drills have become more commonplace as pressure is placed on schools and law enforcement to prevent the next attack. Yet others argue the traumatizing effects of such exercises on the students. Additionally, violence between students continues to remain problematic as bullying pervades children's lives both at school and at home, leading to negative mental health impacts and, in extreme cases, suicide. Establishing safer school policies, promoting violence prevention programs, building healthier classroom environments, and providing better staff training are all vital for protecting students physically and mentally. The Research Anthology on School Shootings, Peer Victimization, and Solutions for Building Safer Educational Institutions examines the current sources of violence within educational systems, and it offers solutions on how to provide a safer space for both students and educators alike. Broken into four sections, the book examines the causes and impacts that peer victimization has on students and how this can lead to further violence and investigates strategies for detecting the warning signs. The book provides solutions that range from policies and programs that can be established to strategies for teaching nonviolence and promoting coexistence in the classroom. Highlighting a range of topics such as violence prevention, school climate, and bullying, this publication is an ideal reference source for school administrators, law enforcement, teachers, government and state officials, school boards, academicians, researchers, and upper-level students who are intent on stopping the persisting and unfortunate problem that is school violence.~~

~~This timely text, written by experts in research, practice and training in the field, proposes a whole-school community approach to the reduction and prevention of school violence. Underpinned by recent research findings, the book is illustrated throughout with case studies, examples of good practice in action, ideas and resources including exercises, activities and checklists. The book covers: - personal characteristics of perpetrators, victims and bystanders - role of the family - ethos and culture of the school - quality of interpersonal relationships at school - quality of the learning environment of the school - links between school and community The authors' approach aims to promote non-violence , improve the climate of the school, enhance relationships among staff, pupils and parents, and to support the emotional health and well-being of all members of the school community. Strategies include preventative methods, provision for the individual needs of pupils and peer support, emotional literacy and restorative practice. The authors also provide guidance on how to create a shared understanding of school violence, how to prepare for change and how to carry out an effective needs analysis in order to successfully address the issue. This book is essential for practitioners, students in education and school management as well as local educational advisors.~~

~~Math problem solving activities.~~

~~In this practical resource, The authors maintain that to effect real reform today's educators must understand how leading and managing for instructional improvement gets done in their school and in turn use their diagnoses as the basis for mindful design and redesign.~~

~~This volume of collected articles from the archives of School Library Connection provides school librarians and LIS professors with a one-stop source of information for supporting the core library principle of intellectual freedom. School librarians continue to advocate and champion for student privacy and the right to read and have unfettered access to needed information. Updated and current information concerning these issues is critical to school librarians working daily with students, parents, and faculty to manage library programs, services, and print and digital collections. This volume is an invaluable resource as school librarians revisit collection development, scheduling, access and other policies. Library Science professors will find this updated volume useful for information and discussion with students. Drawing on the archives of School Library Connection, Library Media Connection, and School Library Monthly magazines—and with comprehensive updates throughout—chapters tackle privacy, the right to read, censorship, equal access to information, and other intellectual freedom issues. New laws and legal and ethical opinions continue to appear and help inform the daily response school librarians have to current issues. This volume updates all included articles with current legal thought and opinion. Intellectual freedom expert April Dawkins, PhD and editor, offers practical advice and commentary throughout. Includes up-to-date coverage of a wide range of intellectual freedom topics Looks at current and applicable laws Features important topics for discussion in LIS classes Immediately usable in schools, and for school district staff development on these important and relevant topics~~
