Nys Lab Relationships And Biodiversity Answers

What does this lab entail? •Seven tests that look at the physical, chemical, and microscopic characteristics of three plants that may be able to create Curol, even though they are not Botana curus (the plants that does produce it). •Comparison of data to determine relationships. •Define the crucial need for biodiversity.

Relationships and Biodiversity NYSED Lab Review

This lab has 7 tests used to determine the relatedness of 4 plant samples. Remember that scientists use a variety of evidence to determine evolutionary relationships, including cell types, structural morphology, DNA, behavior, embryology, and fossils. The more criteria that are shared between organisms, the more likely they are closely related.

Review Sheet

Relationships and Biodiversity. biodiversity– a measure of the number and types of organisms in a location • helps maintain ecosystem stability • useful to humans for food, medicine, clothing, shelter, oxygen, soil fertility, future genetic variation, enjoyment • we have no right to destroy.
